Our Oceans Greening Our Future

The theme of World Ocean Day this year is "Our Oceans: greening our future." Oceans are the lungs of our planet, providing most of the oxygen we breathe, the oceans are also a major source of food and medicines and a critical part of the biosphere.

The call is for ridding the oceans of plastic, e-wastes, providing navigational safety including safety aids for navigation, prevention and reduction of pollution from ships and protecting vulnerable and protected marine areas.
