Subject:- Knowledge Co-creation Programme (International Study Tour) -Call For Nominations

Dear Sir/Madam,

Indian Council for Training & Social Research (ICTSR) (Established by Govt. of NCT of Delhi,). ICTSR serves as a autonomous body for different sectors of the Indian industry.The primary objective of ICTSR is to provide training to officers belonging to the Central/State Government Service, as well as officers from other organized/subsidiary services that operate within the State and Central Government. This training aims to enhance the skills, knowledge, and capabilities of these officers, enabling them to perform their duties more effectively and efficiently.In essence, ICTSR plays a crucial role in the professional development of government officers, contributing to the overall improvement of administrative services within the central and state government.

In response to the demands of today's rapidly changing business environment, continuous evolution and enhancement of one's knowledge base are essential. While experiential learning remains invaluable, staying abreast of emerging technologies and best practices, particularly in technical realms, is imperative for project productivity and overall work effectiveness. We are thrilled to introduce our specialized program, the Study Tour for Construction Professionals, meticulously designed for executives and decision-makers in various sectors including local, state, and central government, as well as the corporate sphere. By facilitating international tours, our program aims to provide participants with a comprehensive understanding of cutting-edge practices and innovations globally. As India positions itself on the global stage, this initiative is poised to empower participants with the insights and exposure required to contribute effectively to the nation's growth.

The Capacity Building program, facilitated through Technical Cooperation Programs with various governments and international partners, encompasses a diverse range of thematic areas aimed at enhancing leadership, managerial skills, and business administration. The program addresses critical global challenges while emphasizing the development of "Smart and Sustainable Cities." It offers a comprehensive array of training initiatives, spanning disciplines such as Seismology, Earthquake Engineering, Tsunami Disaster Mitigation, Operation and Maintenance of Urban Water Supply Systems, Public Health, Food Security, Civil Supplies, Disaster Risk Reduction, Infrastructure Development, Gender Mainstreaming Policies, Renewable Energy, and Forestry Management. Through these initiatives, participants gain valuable insights into modern management practices, enabling them to effectively contribute to the growth and sustainability of urban centers. The collaboration with governments from Europe, UAE, Russia, Japan, and Southeast Asian countries underscores the international nature of this endeavor, fostering cross-cultural learning and knowledge exchange to address the complex challenges of our rapidly evolving world.

ICTSR has planned to organise the international study tours on different topics in below mentioned cities
